

**PROGRESSIVE REOPENING**

**OF EDUCATIONAL CHILDCARE SERVICES**

- › **As of May 11**, the following applies to all regions of Québec except the Communauté métropolitaine de Montréal (Montréal metropolitan community):
  - Children who attend an emergency educational childcare centre will return to their usual educational childcare centres.
  - Educational childcare services are reserved for the children of parents whose employment is included in the list of priority services and activities. This list will be expanded gradually. The children of school personnel will have access to this service starting May 4.
  - All types of daycare centres will reopen for the children of parents working in priority jobs, and their capacity will increase progressively.
  - Parents who are entitled to this service have the option to use it or not, while maintaining their children's place at their usual daycare at no charge.
  - Regular fees will be re-established for any parents who resume using childcare services.
  
- › **As of May 19**, the above scenario will also come into effect for the Montréal metropolitan community, depending on the progression of the health situation.
  
- › Emergency daycare services, which are reserved for children of parents working in the health and social services sectors and in essential services, will remain open until May 8, inclusive (until May 15 for the Montréal metropolitan community, provided the situation allows it).
